YOURWORLD

Roman Hindi Guide

Code snapshot: 16 Oct 2026

App mein kya-kya hai?

A-to-Z screens, earning split, Sports Awards aur testing checklist

Is PDF mein Home, Moments, Reels, Long Videos, Profile, Chat/Calls, Settings, creator earnings ke exact splits, payout, Sports Verification aur National Awards ko asaan examples ke saath samjhaya gaya hai.

Yeh app ke maujooda source code ka guide hai. Isse real account, live server ya har Android device par poori testing ka pramaan na samjhein. Jahan device/server test zaroori hai, wahan alag note diya gaya hai.

Is guide ko kaise padhein

Code mein maujood Is screen/feature ka UI ya implementation current project mein mila.

Device / server test baaki Feature ki final delivery Android phone, live backend, network, permissions ya account data par depend karti hai.

Yeh user guide Roman Hindi mein hai. App ke button names English ya app ke selected language (English/Hindi) mein dikh sakte hain. Kuch deep screens mein English text reh sakta hai.

Scope: Project ke route aur feature code ko read-only inspect karke yeh inventory banayi gayi. Is kaam mein app ka UI, database, auth, chat ya video logic edit nahi kiya gaya. Sirf PDF deliverable taiyar kiya gaya.

Jaldi se main navigation

Bottom bar	Kya khulta hai
Home	Main feed aur social content.
Reels	Full-screen vertical short-video feed.
Create (+)	Reel, Long Video ya Live create karne ke choices.
Chat	Conversations; unread message count badge bhi aa sakta hai.
Profile	Apna profile, content tabs aur Settings ka entry point.

Search, Notifications, Moments, Account, Wallet aur creator screens alag routes/screens ke roop mein project mein maujood hain. Kuch actions login ya creator permissions maangte hain.

Contents

1. Home, Search aur Notifications
2. Moments: dekhna aur banana
3. Reels
4. Long Videos
5. Profile
6. Chat aur Calls
7. Settings: har panel ka map
8. Creator tools, Live aur Wallet
9. Account, safety aur legal pages
10. Recent fixes aur Android test checklist
11. 12. Creator kamai: app aur creator ka hissa
12. 13. Reels vs Long Video: views aur paid video ka rate
13. 13. ₹ ke examples aur payout ka hisaab
14. 14. Sports Profile aur verification
15. 15. National Awards: badge, process aur cash amount
16. 16. Seedhe jawab aur finance checklist

1. Home, Search aur Notifications

Home / Feed

Kahan: Bottom bar ka Home icon.

Yeh main social feed screen hai. Yahan social posts aur video content browse karne ka entry point milta hai; content user, follow state aur backend data ke hisaab se badal sakta hai.

Check karein: feed load, scroll/refresh, post open, like/comment/share options aur creator/profile navigation.

Search

Kahan: Search screen/entry point.

Project mein dedicated Search route hai. Search results aur available content account, query aur server data par nirbhar karte hain.

Check karein: kisi username ko search karein; result profile khole; no-results aur loading states bhi dekhein.

Notifications

Kahan: Notifications screen.

Likes, comments, new followers, messages, calls, channel/monetization aur system alerts ke liye notification preferences Settings mein bhi milti hain.

Check karein: app ke andar notifications aur Android system notifications dono; phone permission/channel alag se allow hona chahiye.

2. Moments

Moments dekhna

Kahan: Home ke Moments entry/strip se ya Moment link se.

- Ek Moment mein kai photo/video segments ho sakte hain; viewer progress dikhata hai aur segments aage badhte hain.
- Tap/gesture se playback control aur next/previous segment navigation.
- Video/audio ya background music playback support.
- Moment par reply bhejna; keyboard khulte waqt reply bar ko visible rakhna.
- Apne Moment ke viewers dekhna; viewer ke like state bhi dikh sakte hain.
- Moment owner apna item delete kar sakta hai; available item ko gallery mein save karne ka action bhi hai.

Moment banana

Kahan: Create sheet se Moment creation flow.

- Photo/video ya multi-part content chunna aur preview karna.
- Text, caption, drawing/sticker overlays aur music jaise edit controls (media/type ke hisaab se).
- Audience choose karna; logon ko mention karna.
- Reel/Long Video ko Moment ke through share/preview karne ka flow.

Audience choices aur media permissions har upload mein alag ho sakte hain. Publish se pehle preview check karein.

Recent code note: Multi-segment viewer, replies aur mention delivery ke liye code paths maujood hain. Har phone/network par segment-to-segment playback aur notification delivery ko real account se verify karna chahiye.

3. Reels (Short Video)

Kahan: Bottom bar → Reels. Feed full-screen vertical video ke liye hai.

Dekhna

- Upar/neeche swipe karke agla/pehla Reel.
- Playback, sound on/mute aur seek controls.
- Creator profile par jaana.

Engagement

- Like; double-tap like interaction.
- Comments kholna aur comment karna.
- Reel share karna ya Moment mein bhejna.
- Save/favorite aur creator ko follow karna.

Reel menu

- Not Interested: is post ko recommendation se hatane ka control.
- Don't Recommend Creator: creator ko hide/unhide list se manage karna.
- Report: reason select karke submit karna.
- Download to Gallery: creator/download permission aur device mode ke hisaab se.

Download / safety

- Download quality choice jahan source options available hon.
- Downloaded Reel par creator watermark ka export flow.
- Report reasons: inappropriate/nudity, spam/scam, hate/harassment, copyright/IP.

Check: double-tap like dono users par same reaction dikhata hai? Not Interested ke baad video hat-ta hai aur Undo/list se wapas aata hai? Creator hide ke baad feed se content rukta hai? Real account se confirm karein.

4. Long Videos

Upload

Kahan: Create (+) → Long Video.

- Horizontal ya vertical long-form video select karein.
- Title, description, category aur preview set karein.
- Custom thumbnail upload karein, preview frame capture karein, ya custom thumbnail na ho to source video se automatic thumbnail banne ka fallback.
- Series/episode grouping, schedule release aur paid-promotion disclosure options.
- Upload progress aur large-file/resumable upload flows.

Watch / manage

- Dedicated video page aur playback controls.
- Quality menu: sirf available source/rendition levels select ho sakte hain; 360p/480p/720p/1080p har video par guaranteed nahi.
- Resume playback position, save/favorite, comments/share/report, aur eligible videos ke offline download options.
- Creator profile par videos aur series discover karna.

Quality ka sach: menu se chosen quality tabhi possible hai jab server par us quality ki playable rendition ho. Network slow ho, rendition missing ho, ya source format alag ho to behavior phone par test karein. Thumbnail bhi publish ke baad upload/processing complete hone par verify karein.

5. Profile

Kahan: Bottom bar → Profile. Kisi aur creator ka public profile search/feed se khul sakta hai.

Area	Isme kya milega
Profile header	Profile photo/avatar, display name/username, bio/category aur follow counts/actions (available user data ke hisaab se).
Connections	Followers aur Following lists/counts.
Content tabs	Videos, Reels, Saved items aur Downloads; downloaded videos device par saved library se aate hain.
Post management	Apne posts ko manage karne ke actions, pin/edit/delete controls (content ownership ke mutabik).
Share	Profile/content link share karna.
Sports profile	Sports identity/details, introduction media aur verification submission flows; review ke liye private evidence upload.

> Profile photo ke liye agar photo unavailable/private ho to initials fallback aa sakta hai. Reel ring, share picker aur profile par photo ko alag-alag real profile se check karein.

6. Chat aur Calls

Chat list aur conversation

- Chats list se conversation kholna, unread count dekhna aur recent chats search karna.
- Text, photo, recorded video, voice note, camera/gallery media, emoji/sticker aur reply.
- Audio/video call controls conversation header se.

Message par long-press / double-tap

- Apne message par Unsend; local copy hatane ke liye Delete for me. Dono actions alag hain.
- Select Multiple, Copy, Forward to recent chat/friend aur Translate.
- Message ko double-tap karke heart reaction toggle.
- Translate ke baad original par wapas jaana.

Chat privacy

- View Once media/voice note (ek baar dekhne/sunne ke liye).
- Auto-delete aur Vanish timer options.
- Secret Lock Chat ke liye secret code flow.
- Read receipts ko Messages & Direct Requests settings se control karna.

Delete test: B ke message par A ka “Delete for me” sirf A ki view se hatna chahiye; “Unsend” sender ke apne sent message ke liye alag action hai. Do phones par dono flows test karein.

Locked/background call: Android notification permission, internet, registered device token aur live API delivery zaroori hain. Current workspace mein call-push privacy query fix hai; live server par wahi fix tab lagega jab API publish ho. Android brand battery settings/force-stop push ko rok sakte hain.

7. Settings: poora map

Kahan: Profile → gear/Settings. Settings panels bottom sheet/modal ke roop mein khulte hain; panel ka max height aur scrolling set hai.

Settings row	Andar ke controls
Account	Contact details, security/session controls aur account delete jaise account actions.
Creator Analytics	Creator/channel performance overview (creator data available hone par).
Monetization & Wallet	Earnings, payout details/history aur available monetization flows.
Data & Media Quality	Data Saver toggle; Upload at Highest Quality toggle.
App Language	English (Default) ya Hindi. Core navigation/settings labels active language se badalte hain; kuch deep content English reh sakta hai.
Privacy	Private Account, Activity Status, Blocked Accounts, Hidden Creators, Not Interested Posts, Comments & Hidden Words.
Messages & Direct Requests	Who can message you: Everyone ya Only People You Follow; Read Receipts on/off.
Comments & Hidden Words	Hide offensive comments toggle; custom words/phrases add/remove list.
Time Management	Daily usage tracker; reminder limit 30m, 1h, 2h ya Off.
Notifications	Likes, comments, new followers, messages, calls, channel monetization aur system alerts toggles.
Help & Support	Help Center, Report a Problem, Community Guidelines aur Copyright Policy.
About	App/product info and legal/support links.

Privacy lists: Hidden Creators screen mein creator ko Unhide karna; Not Interested Posts screen mein post ko list se remove/reset karna; Blocked Accounts screen mein Unblock.

8. Creator tools, Live aur Wallet

Create menu

Reel (short video), Long Video (horizontal/vertical), aur Live (live stream setup) teen alag creation flows hain. Photo/video Moments aur normal post creation ke apne screens hain.

Channel

Channel create/manage aur channel page routes available hain. Creator Analytics se channel/content performance dekhne ka entry point milta hai.

Live

Stream title aur live setup preview, camera/microphone permissions ke saath. Live room ka availability creator/device/network par depend karta hai.

Monetization & Wallet

Wallet screen mein earnings/payout details, payout preview, payout schedule aur payout history jaise areas hain. Payment method aur eligibility server/account status par depend karte hain; yeh guide kisi payout ko approve ya guarantee nahi karti.

9. Account, Safety aur Legal

- **Sign in / sign up:** Auth screen; protected profile/chat screens account ke bina nahi khul sakte.
- **Account Security:** Contact details, active sessions/security controls, two-step verification screen aur account deletion flow.
- **Block/report:** Blocked Accounts manage/unblock; content report reason select karke submit; report processing server moderation par depend karti hai.
- **Copyright:** Help/Settings se copyright policy aur DMCA takedown request form.
- **Community / Privacy / Terms:** Public policy/help screens.
- **Admin:** moderation, sports verification, copyright aur payout-review tools protected admin/owner access ke liye hain; normal user screen nahi.

> **Privacy:** Secret Lock, private-chat/media behavior aur report evidence jaise sensitive features ko sirf apne authorized account/device par test karein. Kisi aur ka secret code ya personal content is PDF mein nahi diya gaya.

10. Recent code fixes aur unki verification

Area	Current code mein kya mila	Abhi kya verify karna hai
Chat list opening	Chat row ko global Home/Chat tab-swipe handler se ignore karaya gaya, taaki row tap ko swipe navigation na le.	Real Android app mein repeated taps aur halki sideways finger movement ke saath test.
Incoming calls	Android locked/screen-off state mein foreground notification suppression se bachaya; API conversation privacy PostgREST OR filter ko sahi parentheses diye. Secret Lock check barkarar.	API fix live users tak pahunchne ke liye server publish; locked/background phone par actual call test. Automated API tests pass hue.
Chat message actions	Menu mein Unsend, Delete for me, Select Multiple, Copy, Forward, Translate options code mein alag dikhte hain.	Do accounts par verify karein ki Delete for me dusre participant ka message na hataye; Unsend sirf sender ke eligible message par ho.
Long video thumbnail	Custom thumbnail, preview frame capture aur no-custom-thumbnail par source se generated thumbnail fallback ka code.	Horizontal + vertical sample videos upload karke thumbnail publish ke baad dekhein.
Video quality	Quality selection/utilities aur playback code available; selected rendition source options se resolve hoti hai.	Ek hi video par 1080p se 720/480/360 par switch; real device par dekhein ki resolution/stream sach mein badla.
Settings sheets	Modal container auto-height, 85vh max-height aur vertical scrolling use karta hai.	Chhote phone par last row scroll karke click karein; gesture bar ke paas clipping check.
Language/translation	English/Hindi language state aur comment/chat translation UI code/tests mein maujood.	App language change, translated label, loading aur See original ko signed-in account par verify karein.
Moments	Segmented playback, reply/viewer code paths available.	3+ segment Moment ko end-to-end play karein; har segment ke baad advance, reply aur expiry check.

Automated checks: Recent chat-navigation focused tests 8/8 pass; call-push API focused tests 9/9 pass; app/API typechecks pass; Debug APK build pass. Yeh results physical device acceptance test ke barabar nahi hain.

11. Aapke liye full phone-check checklist

Har item ko YourWorld ke test account se check karke box tick karein. Calls ke liye A aur B, do alag accounts/phones ka use karein.

- [ ] Home feed khulta hai; post kholna, like/comment/share aur wapas aana.
- [ ] Search se user dhoondhkar sahi profile khulti hai; Notifications open hote hain.
- [ ] Moment mein 3 ya zyada segments: progress, next/previous, reply, viewer list, sound.
- [ ] Reel double-tap like: A aur B dono screens par heart/reaction; menu se Not Interested, creator hide, report.
- [ ] Reel share/Save/download; profile photo ring aur share-picker avatars.
- [ ] Long video horizontal aur vertical: custom thumbnail, bina custom thumbnail auto thumbnail, title/caption, upload completion.
- [ ] Long video quality 1080p → 720p → 480p/360p: har switch ke baad actual resolution change.
- [ ] Video resume, comments/share/report, offline download aur downloaded file playback.
- [ ] Profile: edit/share, followers/following, Videos/Reels/Saved/Downloads tabs, sports details (agar enabled).
- [ ] Chat list se conversation kholna; app Home par na chali jaye. Baar-baar repeat karein.
- [ ] B ke message par A: Delete for me; B ki screen par message rehna chahiye. A ke sent message par Unsend alag test.
- [ ] Chat: double-tap heart, Copy, Forward to recent chat, Translate/See original.
- [ ] Chat: photo, camera video, voice note, View Once, Vanish timer, Auto-delete, Secret Lock.
- [ ] Audio aur video call: foreground, background, lock screen/off; accept, decline, missed call.
- [ ] Settings: data toggles, English/Hindi, privacy lists, message privacy, hidden words, daily limit, notifications.
- [ ] Settings sheet ka last option scroll karke visible/clickable; app restart ke baad saved preferences check.
- [ ] Wallet/Creator/Live features sirf eligible account aur required permissions ke saath check.

Call note: Phone notifications enabled hona kaafi nahi ho sakta: YourWorld notification channel, network, registered push token aur live API availability bhi chahiye. Android battery optimization/force-stop restrictions ka result phone brand ke hisaab se badal sakta hai.

12. Creator kamai: app aur creator ka hissa

Kamai ek hi fixed rate se nahi hoti. Pehle dekhein earning kis source se aayi: ad/impression, paid Long Video purchase, ya Course/VIP sale. App ka hissa aur payment gateway ka charge alag cheezen hain.

Source	Creator share	YourWorld/App share	Extra charge
Ads / digital impressions (eligible Reels ya Long Video ad revenue)	Net ad revenue ka 70%	Net ad revenue ka 30%	Ads split mein buyer gateway surcharge nahi.
Paid Long Video purchase	Video price minus 15% app fee minus gateway fee/tax	Video price ka 15%	Gateway actual charge; actual na mile to 2.36% estimate.
Course / VIP sale	Base list price ka 85%	Base list price ka 15%	Buyer base price ke upar 2% gateway surcharge deta hai.

> **Sabse zaroori farq:** Reels/Long Video ke views ki ginti khud se ₹ nahi banati. Earning tab aati hai jab eligible ad/impression revenue ya paid purchase settlement ho. Current code mein “har 1,000 views = ₹X” ka fixed rate nahi mila.

Reels: Eligible advertising/digital-impression revenue record ho to 70% creator / 30% app. Alag Reel-view rupee rate set nahi hai.

Long Video: Ad revenue ho to wahi 70/30 rule. Video paid ho aur buyer purchase kare to alag rule: 15% app commission aur gateway charge creator ke share se nikalta hai.

Terms screen par Ads/Digital Impressions 70/30 aur Course/VIP 85/15 likha hai. Paid video ke liye settlement code mein 15% app cut aur gateway calculation hai; public terms page paid-video calculation ko utni detail mein alag se explain nahi karta. Latest in-app terms ko final samjhein.

13. Reels vs Long Video: views aur paid sale

Content	Sirf view count se kitna?	Revenue aane par
Reel	Fixed ₹/view ya ₹/1,000 views rate code mein nahi.	Eligible ad/digital-impression earning: creator 70%, app 30% of net ad revenue.
Public Long Video	Fixed ₹/view ya ₹/1,000 views rate code mein nahi.	Ad/digital-impression earning: creator 70%, app 30% of net ad revenue.
Paid Long Video	Views nahi, buyer ki successful purchase se earning.	App 15%; gateway actual ya 2.36% fallback estimate; baaki creator ko.

View counting ka matlab

Server video/Reel viewing session validate karta hai. Ledger ek content ke liye account aur persistent device ke duplicate view-credit ko rokta hai. Yeh valid view tracking hai; yeh per-view payment rate nahi hai.

Seedha jawab: Reel aur free Long Video ke liye alag guaranteed ₹ rate nahi dikh raha. Dono par ad revenue ho to 70/30. Paid Long Video sale par 15% app fee, phir gateway charge; baaki creator ko. Views par ad income actual ad revenue/eligibility se tay hoti hai.

14. ₹ ke examples: hisaab bilkul seedha

Yeh examples current code ke rates par hain. TDS wala “haath mein” amount tabhi samjhein jab payout eligible ho aur ₹5,000 threshold/KYC conditions poori hon. Gateway ka actual charge example se alag ho sakta hai.

Example	Hisaab	Creator / App ko kya
₹1,000 eligible net ad revenue (Reel ya Long Video)	₹1,000 × 70% / 30%	Creator ₹700 before payout TDS; app ₹300. Agar yeh hissa payout mein ho, 1% TDS ₹7; net ₹693.
₹1,000 paid Long Video; gateway 2.36% estimate	App: ₹150. Gateway estimate: ₹23.60.	Creator credit ₹826.40 before payout TDS. 1% TDS about ₹8.26; illustrative net ₹818.14.
₹1,000 Course/VIP base price	Buyer surcharge ₹20 (2%); buyer total ₹1,020. App ₹150; creator ₹850.	Creator ₹850 before payout TDS. 1% TDS ₹8.50; illustrative net ₹841.50. Gateway surcharge buyer se.
₹5,000 available creator payout balance	1% Section 194-O TDS: ₹50.	Illustrative net bank payout ₹4,950, subject to payout eligibility and schedule.

Yeh per-video guarantee nahi: ₹1,000 ad revenue ka example tabhi hai jab ledger mein ₹1,000 net ad/impression revenue sach mein aaya ho. Sirf views ki wajah se ₹1,000 ya koi fixed amount nahi milta. Paid-video gateway actual bill 2.36% se alag ho sakta hai.

15. Wallet payout: paisa bank tak kaise aata hai

1. **Wallet:** Profile → Settings → Monetization & Wallet. Creator Analytics alag screen hai.
2. **Source:** Ads, Course/VIP aur paid video alag rules se credit hote hain.
3. **Eligibility:** Monetization terms accept karein, payout details dein, required KYC verify karein. Terms ke mutabik monetization/payout ke liye creator 18+ hona chahiye.
4. **Minimum:** Current wallet/payout code ₹5,000 minimum available balance/withdrawal threshold dikhata hai. Isse kam par request nahi ho sakti.
5. **Schedule:** 15-day ya 30-day settlement cycle choose ki ja sakti hai; payout instant hone ki guarantee nahi.
6. **TDS:** Payout ke waqt 1% TDS creator payout se deduct hota hai, Section 194-O ke under. Code ke mutabik PAN se linked hota hai.
7. **Record:** Wallet payout preview/history mein requested amount, TDS aur net amount dekhein.

> **App cut vs gateway vs TDS:** App fee YourWorld ka share hai. Gateway fee payment processor ka charge hai. TDS tax withholding hai jo creator payout se kat-ta hai. In teenon ko ek hi “app cut” mat samjhein.

₹5,000 par ₹50 TDS aur ₹4,950 net sirf samjhane ka example hai. Bank processing, KYC, account eligibility, schedule aur applicable tax treatment se actual amount/timing alag ho sakti hai. Tax advice ke liye qualified tax professional se baat karein.

16. Sports Profile aur Sports Verification

Kahan: Apne Profile mein Sports Profile / Sports Details editor. Yeh monetization wallet se alag feature hai.

Form mein kya bhara ja sakta hai	Kya dikhaya/review hota hai
Player ya Coach; sport; event position; National ya International representation	Profile par sports role/identity badge aur public sports details.
Competition/tournament, year/date, result, medal/position; achievements	National Games, Khelo India, Asian/World/Commonwealth aur other recognized competitions jaise options.
Coach name/qualification/year/institution (Coach profile)	Profile details review ke liye evidence ke saath bheje ja sakte hain.
Sports Introduction video aur verification documents	Introduction video profile par public ho sakta hai; private identity/certificate evidence restricted review ke liye.

Verification team application review karti hai; approved/rejected status aur rejection reason user ko dikh sakta hai. National/International status ko proof ke bina claim na karein.

> **Cash/reward amount:** Current Sports Verification code mein fixed ₹ reward, salary, prize amount ya per-medal payment configured nahi mila. Yeh sports credentials/profile verification hai—earning program nahi.

17. National Awards: badge, process aur cash amount

Yeh Sports Verification se alag hai. National Award Profile option India-country eligibility ke liye dikhaya gaya hai. Form mein award aur year choose karke identity/award evidence submit hota hai.

Code mein listed award groups

- Bharat Ratna
- Padma Award: Vibhushan / Bhushan / Shri
- Param Vir Chakra / Ashoka Chakra
- Shaurya Chakra / Kirti Chakra
- Sena Medal (Gallantry)
- President's Police Medal for Gallantry (PPMG)

Submit karne ka flow

1. Award, award year aur required personal/contact/address details fill karein.
2. Certificate ya Gazette proof upload karein. Code limit: 15 MB; PDF/JPG/PNG/WebP.
3. Award introduction video upload karein. Code limit: 100 MB; MP4/WebM/MOV.
4. Verification terms padhein, authenticity confirm karein aur submit karein.
5. Admin official records cross-check kar sakta hai; stated review window 12-72 working hours hai. Status pending/approved/rejected ho sakta hai.

Document privacy: Certificate/Gazette evidence private verification file hai. Award introduction video verified award profile ke saath public ho sakta hai. Fake/edited information par rejection/revocation aur account restriction ho sakti hai.

Cash amount: Current National Award module verification badge/profile confirmation ke liye hai. App code mein in listed awards ke liye alag cash prize, creator reward ya ₹ amount set nahi mila. Is verification ko paisa milne ka promise na samjhein.

18. Seedhe jawab aur final checklist

Aapka sawal	Current code ka seedha jawab
Reel par kitna ₹ per view?	Fixed ₹/view ya ₹/1,000 views rate nahi mila. Eligible ad revenue ho to 70% creator / 30% app.
Long Video par kitna?	Ads: 70/30. Paid purchase: 15% app fee + gateway actual/2.36% estimate; baaki creator, phir payout TDS.
₹1,000 ad earning mein app kitna?	₹300 app; ₹700 creator before payout TDS.
₹1,000 paid Long Video mein app kitna?	₹150 app; gateway estimate ₹23.60; creator ₹826.40 before payout TDS.
₹1,000 Course/VIP base sale?	Buyer ₹1,020 pays; app ₹150; creator ₹850 before TDS.
Sports profile/medal par prize?	Current Sports Verification code mein fixed cash prize/reward nahi.
National Award verification par cash?	Cash payout configured nahi; verified profile badge/status hai.
Payout ke liye kitna?	₹5,000 threshold, verified payout/KYC and accepted terms; 15/30-day schedule; 1% TDS.

- [ ] Wallet mein ads, paid video, Course/VIP earning ko alag dekhein.
- [ ] Gross, creator amount, app fee, gateway charge aur TDS ko alag compare karein.
- [ ] Paid video par actual gateway fee confirm karein; 2.36% fallback estimate hai.
- [ ] Sports/Award verification ko cash award na samjhein jab tak official terms mein prize amount na ho.
- [ ] Current monetization policy, eligibility, KYC aur settlement cycle submit karne se pehle padhein.

Rates source-code snapshot: 16 October 2026. Ads/direct-sales rates monetization terms aur settlement code se liye gaye; paid-video example 2.36% fallback par hai. Yeh legal/tax advice nahi aur guaranteed income statement nahi.

Appendix: screen map

Yeh project ke screen routes ka short index hai. App ke andar user ko route path ke bajay button/title dikh sakta hai.

Area	Screen path
Home / Create / Post	/ ; /create ; /post/create
Moments	/moment ; /moment/create ; /moment/:momentId
Reels	/reels ; /reel/:reelId
Long Video	/video/upload ; /video/:videoId ; /watch/:contentId ; /downloads/:downloadId
Profiles / Search	/profile ; /u/:userId ; /search
Chat / Alerts	/chat ; /chat/:threadId ; /notifications
Account / Settings	/account ; /settings ; /auth ; /verify-2fa ; /reset-password

Channel / Live / Wallet	/channel ; /channel/create ; /channel/analytics ; /live/create ; /live/:streamId ; /wallet
Help / Legal	/help-center ; /privacy ; /terms ; /terms/monetization ; /community-guidelines ; /copyright-policy ; /licenses
Admin-only	/admin ; /admin/sports-verification ; /admin/copyright-reports ; /admin/national-awards

Short summary: YourWorld mein short video (Reels), long video, Moments, chat/calls, profiles, privacy and media settings, creator/channel tools aur moderation/legal screens ka code map hai. App ki live availability/data account, backend deployment aur phone permissions se change ho sakti hai.

Prepared from the current YourWorld project source. Snapshot date: 16 October 2026. No user account data or secrets included.
